NEUROSCIENCE 2024

Early Career Poster Session: Early Career Policy Ambassador (ECPA) Posters

Society for Neuroscience
Saturday, October 5
6:30–8:30 p.m. CDT
McCormick Place Convention Center: Hall A

The Early Career Poster Session features participants of the Society for Neuroscience's Early Career Policy Ambassador (ECPA) Program. These presentations from current ECPAs highlight their neuroscience advocacy and policy work. The ECPA program is a 10-month program that allows early career scientists to meet with their policymakers and gain the necessary skills to advocate for science and to encourage those in their personal networks to join the conversation.
